

Combi can

This in-house developed combi can has an effective fuel overfill protection. When the tank is full, the flow is automatically shut off and you can lift the can up without spillage. The cans can be separated from each other, with space for files and tools in between them.

Placement for cap

Placement on the can for fuel and oil cap.

Overfill protection

When the tank is full, the flow is cut off automatically and you can lift up the can without spillage.

Space between cans

Space between cans for placing files and other tools.

Date marking

Date marking placed on the bottom of the can.

FEATURES

- Extra space to place files and other tools
 - Overfill protection prevents spilling
- Placement keeps the cap in place
 - Date marking placed on the bottom of the can
